People, places and planets: new books of and about photography

MODEL AMERICAN
KATY GRANNAN

People's choice

Katy Grannan's first monograph, which has already received high praise from the artist and *ArtReview* editorial board member Richard Misrach, resonates with an uneasy tension between photographer and subject. Placing ads in local papers Grannan invites people to sit for her and to choose how and where they are photographed. Her portraits reveal Grannan to be one of the most exciting young contemporary photographers. *Aperture*, \$40
